

THE umbili-CLAMP®

TAMPER-RESISTANT UMBILICAL CORD CLAMP

The patented Divergent **umbili-CLAMP®** is designed to clamp the umbilical cord immediately after birth. Its tamper resistant closure system ensures that the lock is properly closed and secured. This helps to ensure against accidental or unauthorized opening of the clamp.

UNIQUE AND PATENTED DESIGN

- Security lock to prevent accidental opening after clamping
- Longer cord gripping surface area with larger teeth to accommodate larger cords.
- Wider finger grips for easy and secure application with gloves.
- Rounded edge surfaces to prevent snag clothing or get caught on bed linen.

PATIENT SAFETY

- Tamper resistant closure reduces the risk of accidental or unauthorized opening.
- Single use device helps prevent the risk of cross-contamination.

PACKAGING

- Individually packaged and sterilized (eTO).
- Available in white or yellow.

REGULATORY

- FDA registered Class I device.
- Medical grade, nontoxic material which is DEHP and lead-free.
- CE and ISO 9001:2008 compliant.

AND, COST-EFFECTIVE

- 30–70% less expensive than similar products.
