THE umbili-KIT[®]

MOTHER/BABY POSITIVE IDENTIFICATION SYSTEM

The **umbili-KIT System** was designed to assist healthcare professionals in ensuring the safest mother/baby care experience. With the Umbili-KIT System, clinical care procedural errors, discharge mistakes and incorrect identification resulting in the discharge of infants to the wrong families is significantly reduced.

Each **umbili-KIT** features components with a matching, unique number to pair a newborn to their birth parent. The system provides essential, built-in redundancy through the use of a matching tamper-resistant cord clamp, identification band, optional stick-on labels, and identification cards.

EACH KIT CONTAINS

- (1) Sterilized, Numbered, Tamper-resistant umbili-Clamp
- (1) Numbered, DuraSoft or DuraProtect Identification Band
- (1) Positive Mother/Baby Identification Crib Card
- (1) User Application Guide

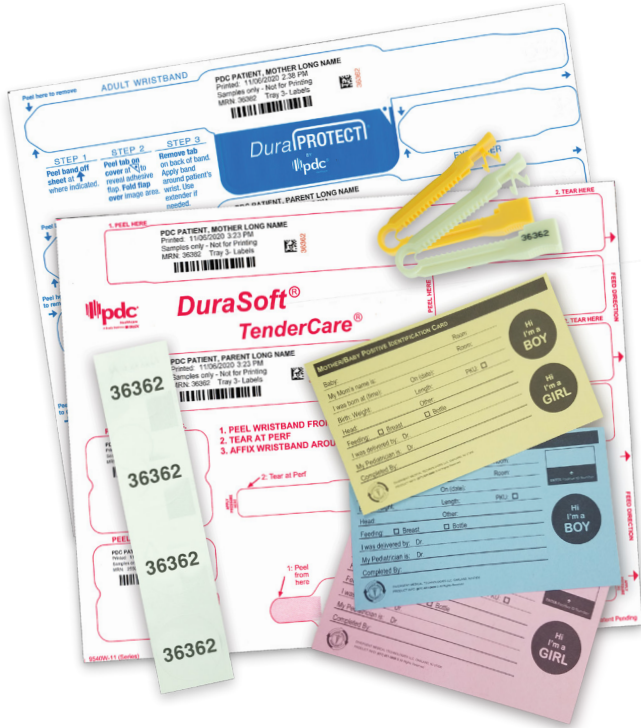

Options include: 4-part Stick-on Labels, Unnumbered Yellow Clamp, Disposal umbili-CLAMP Cutter, Foot Printers and Ink Remover Towelettes
